SUBJECT INDEX

Acids, in cellulose, 311
Acrylonitrile, polymerization of, 403
Arabinogalactans, water-soluble, 63, 73
Birch xylan, solution properties of, 9, 29
Birefringence, of cellulose fibers, 515
Carbohydrate graft copolymers, 189
Carbonyl groups, in cellulose, 289
Cellulose, absolute intensity measurements on, 449
  acids in, 311
  birefringence of fibers of, 515
  carbonyl groups in, 289
  chains of, 423
  fractional extraction of, 487
  future research, 273
  glycosidic linkages in, 109
  graft copolymers of, 387
  grafting polymers onto, 169
  microcrystals of, 129, 145
  optical dispersion of fibers of, 515
  ozonization of, 79
  polymerization within matrices of, 377
  polymetaphosphate solution penetration into, 477
  pyrolytic decomposition of, 331
  as a raw material, 277
  sedimentation, 117
  structural studies of fibers of, 499
  as a textile, 283
  viscosity of, 117, 321
Cellulose acetate, grafting of styrene on, 415
Configuration, birch xylan, 29
Decomposition, pyrolytic, of cellulose, 331
Elasticity, of polyvinyl alcohol filaments, 527
Fractionation, birch xylan, 29
Gas chromatography, for study of pyrolytic decomposition of cellulose, 331
Gel particle counting, of viscose, 357
Gels, of cellulose microcrystals, 129, 145
Genetic material, chemical nature of, 263
Glycosidic linkages, in cellulose, 109
Graft copolymers, of cellulose, 387
Graft polymerization, of styrene in wood, 153
Initiators, ceric ions as, 403
Kinetics, acid hydrolysis of poly- and oligosaccharides, 97
Lignin, distribution in woods, 203
Molecular weight, birch xylan, 9
Morphology, of prosenchyma cell wall, 253
Nonwoven fabrics, 279
Oligosaccharides, kinetics of acid hydrolysis, 97
  from 4-*O*-methylglucuronoxylan, 49
Optical dispersion, of cellulose fibers, 515
Optical rotatory dispersion, of viscose, 357
Ozonization, of cellulose and wood, 79
Paper, 279
Permeability, of wood, 231
Polyoligosaccharides, kinetics of acid hydrolysis, 97
Polyvinyl alcohol, elasticity of filaments of, 527
Radiation, for grafting polymers onto cellulose, 169
  for graft polymerization of styrene in wood, 153
Reaction rates, of carbonyl groups, 289
Sedimentation, of cellulosic macromolecules, 117
Solid-solution structures, in wood, 243
Strength reinforcement, 377
  graft polymerization in wood, 153
Styrene, grafting on cellulose acetate, 415
  radiation grafting onto cellulose, 169
Viscose, chemistry of, 341
  gel particle counting, 357
  optical rotatory dispersion, 357
  state of solutions of, 357
Viscosity, of cellulosic macromolecules, 117
  in chemically modified cellulose, 321
Wood, graft polymerization of styrene in, 153
  influence of morphology on, 253
  lignin distribution in, 203
  ozonization, 79
  permeability of, 231
  solid-solution structures in, 243
  tertiary wall in, 213
  warty layer in, 213
Xanthating reactions, 341
X-ray orientation, measurement of, 429
X-rays, for measurements, 449
